Data updated as of November 2020

¹ For the complete data and descriptions, please go to the data dashboard on the CPS website. A five-year trend was examined in setting targets. For the purposes of this 1-pager, only 2017 is shown.

³ A new baseline and target was established in 2019 due to new understandings about the data source.

⁴ Students and families were first surveyed in 2018 and staff in 2019. Due to Covid-19, the specific school climate survey questions are no longer appropriate to include in our annual survey.

⁵ These surveys are given every other year; therefore, 2019 represents the target year for middle grades. It is uncertain whether these surveys will be administered in SY20-21.
